Precision

Perfecto U-PVC system reflects the impeccable quality and finish that is associated with the German masterpiece. Ideal for all those who are simply not prepared to compromise neither on technology nor appearance.

Elegance

Along with security and a pleasant atmosphere, the Perfecto U-PVC boasts of modern style and attractive optics that work as essential style elements for you space.

Tranquility

The depth and chambers in the perfecto U-PVC system give optimum heat insulation, keeping out of your own walls. The modern window technology gives high security and keeps unwanted "guests" out.

Material Properties

German U-PVC compound is an impact modified unplasticised PVC extrusion compound having high impact strength complying with BS7413 : 1991

Impact Strength

Profiles extruded from German U-PVC Compound are outstanding for their resistance to fracturing which is particularly evident at temperatures below 0° C.

Weather Resistance and Colour Stability

German U-PVC profiles have outstanding weather resistance and colour stability. These important characteristics have been confirmed by more than twenty five years of actual use. German U-PVC profiles also possess high resistance to the various pollutant effects of an industrial atmosphere.

Thermal Performance

Perfecto systems exceed the current requirements of the building regulations concerning minimum U values.

Processability

German U-PVC compounds designed specifically for window profile extrusion to be "Manufacture Friendly" and ideally suited to the heat welded process.

Flame Resistance

German U-PVC compounds are flame resistance in accordance with BS 476, (Pt 6 & 7). The formulation guarantees flame resistance without the necessity for further additives and results in the material being defined as self extinguishing.
