# WINTERGARDEN

## WINTERGARDEN

Wintergarden, the glass extensions are luxury constructions in aluminium & glass. They are built to be attached to an existing building (houses, restaurant, hotel...), or as a free standing construction.

The conservatory glass house enlarges the living space & adds a new dimension to the home. It is a lifetime investment & must therefore meet the expectations of the client transform a dream into reality.

The wintergardens can be used throughout the year, giving people a more comfortable life by creating a new living room, between the house & nature. Because of the presence of an abundance of light, the glass room contributes to a sense of well being of its inhabitants.
